Ig heavy chain V-III region (ART) - human (fragments)
C;Species: Homo sapiens (man)
C;Date: 16-Nov-1990 #sequence_revision 16-Nov-1990 #text_change
C;Accession: A36040
R;Eulitz, M.; Weiss, D.T.; Solomon, A.
Proc. Natl. Acad. Sci. U.S.A. 87, 6542-6546, 1990
A;Title: Immunoglobulin heavy-chain-associated amyloidosis.
A;Reference number: A36040; MUID:90370821; PMID:2118650
A;Accession: A36040
A;Status: preliminary
A;Molecule type: protein
A;Residues: 1-218 <EUL>
C;Superfamily: immunoglobulin C region; immunoglobulin homology
C;Keywords: heteroretramer; immunoglobulin
F;132-199/Domain: immunoglobulin homology <IMM>

Complex: An immunoglobulin heterotetramer subunit consists of two identical light disulfide bonds. In some cases, such as IgA and IgM, the subunits associate C. Superfamily: immunoglobulin C region; immunoglobulin homology C. Keywords: alternative splicing; duplication; glycoprotein; heterotetramer; immun F. 21-91/Domain: immunoglobulin homology < IMMI>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       R;Kawakami, T.; Takahashi, N.; Honjo, T.

Ig heavy chain - nurse shark

C;Species: Ginglymostoma cirratum (nurse shark)

C;Date: 13-Sep-1996 #sequence_revision 13-Sep-1996 #text_change 21-Jul-
C;Accession: ISO731

R;Vazquez, M.; Mizuki, N.; Flajnik, M.F.; McKinney, E.C.; Kasahara, M.
Mol. Immunol. 29, 1157-1158, 1992

A;Title: Nuclectide sequence of a nurse shark immunoglobulin heavy chai
A;Reference number: ISO731; MUID:92357056; PMID:1495502

A;Accession: ISO731

A;Status: preliminary; translated from GB/EMBL/DDBJ
A;Molecule type: mENNA
A;Residues: 1-577 <VAZ>
